Why Choose a Trident Metal Greenhouse?

Tough Aluminium

Creates a strong and solid frame

Shatterproof Glazing

Polycarbonate is used for its UV properties and the tougher finish avoids breakages.

Tall

Crouch free design, giving you the ultimate space.

Easy to Assemble

Sliding Doors

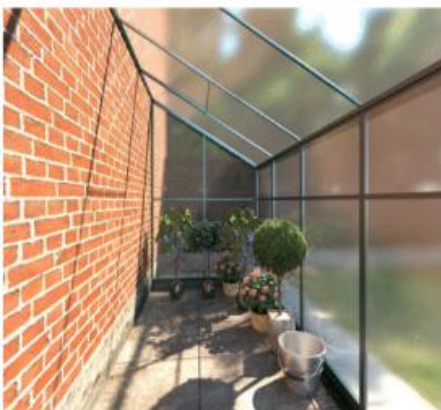

For ease of access in and out of the greenhouses

Rosette Polycarbonate Greenhouse

- Easy access sliding door
- Rust-free aluminium framing
- Built-in guttering for drainage
- Galvanised steel base included
- Solid twin-wall polycarbonate glazing
- 2 opening roof vents

Size	Width	Depth	Eaves Height	Ridge Height
6x4ft	190cm	135cm	134cm	201cm
6x6ft	190cm	192cm	134cm	201cm
6x8ft	190cm	252cm	134cm	201cm
6x10ft	190cm	312cm	134cm	201cm

Polycarbonate Lean-To Greenhouse

- Space saving lean-to design
- Low maintenance, rust free aluminium framing
- 4mm hollow twin polycarbonate panels
- Sliding single door
- Shatterproof glazing
- Water gutters for drainage
- Roof vent for air circulation and good ventilation

- Panoramic Windows
- 2 opening roof vent for ventilation

Size	Width	Depth	Eaves Height	Ridge Height
8x12ft	248cm	366cm	152cm	226cm

Customer FAQs

What is twin-wall polycarbonate glazing?

The roof and windows of our greenhouses are built with twin-wall polycarbonate sheeting, a durable and strong plastic, with two layers for added durability and insulation. Polycarbonate glazing is more robust than traditional glass, so you will not need to worry about it easily shattering and requiring replacement. The polycarbonate sheets allow natural lighting into the inside and will enable enough heat for the plants to grow so that you can achieve the best-growing results from your garden.

How easy are they to build?

Our metal greenhouses are simple and easy to build. We provide easy-to-follow digital instructions.

Does this greenhouse come with a floor/base?

Yes! Our greenhouse includes a strong, galvanised steel base. This allows it to be light and easily transported while giving your greenhouse protection from bugs and excess moisture. It is easily cleaned and gives the structure the strong, perfect foundation it needs to resist rust and keep your building sturdy for years to come.
